

iPS Enterprise

Encrypted Mobile Card Reader

Enhance your mobile card-present checkout process with the iPS Enterprise Encrypted Mobile Card Reader. This reader works seamlessly with the iProcess™ mobile application and offers merchants increased reliability and improvements for processing payments through their mobile terminal via their existing phone or tablet.

Features

- Supported Devices: Apple and Android based devices.
- Secure card reader connects to all mobile devices via the headphone jack.
- Combines the latest technologies for reliable and secure mobile payments and identification.
- Swipe path design yields highest read reliability on first pass.
- Track 1 and 2 data.
- Card reader uses dynamic encryption, tokenization and authentication, which meets PCI P2PE (Point to Point Encryption) guidelines for mobile payments.

iProcess™ Mobile Application Update Required

Merchants must update their iProcess™ mobile application to be compatible with the iPS Enterprise Encrypted Mobile Card Reader. The update will be provided through the App Store and Google Play and is compatible with all supported card readers.
